<b>Garantía</b>	1 año International Travelers Warranty (ITW)		

1. Specifications vary depending on model.  
2. 64-bit software is required to enjoy the advantages of 64-bit processing.  
3. Shared system memory may be allocated to support graphics, depending on system memory size and other factors. Actual system memory available to the operating system will be reduced by any memory used by the graphics solution and resources required by the operating environment.  
4. This system is bundled with DDR3 1333 MHz memory; however, memory speed may vary depending on CPU/chipset support.  
5. A 64-bit operating system is required to enjoy the ultimate performance of 4 GB or higher memory.  
6. Dolby™ is a registered trademark of Dolby Laboratories. Dolby® Home Theater® is a trademark of Dolby Laboratories.  
7. The SSD is integrated with the mainboard and dedicated to Acer Green Instant On. It is not visible in file explorers.  
8. 1 GB is 1 billion bytes. Actual formatted capacity is less and may vary depending on preloaded materials and operating environment.  
9. Two VQE-enabled Acer notebooks with dual-core processors are required to enjoy the exclusive benefits and added performance of VQE.  
10. Actual throughput may vary depending on network conditions and environmental factors such as network traffic or overhead, building construction, and access point settings.  
11. Acer Nplify™, a high-throughput wireless solution, delivers superior performance and reliable connections while enabling emerging voice, video and data applications. Wi-Fi CERTIFIED™, it supports Acer SignalUp™ wireless technology and is compliant with 802.11b/g/n standards.

12. Weight may vary depending on product configuration, vendor components, manufacturing variability, and selected options.  
13. The battery will hold up to 80% of its original capacity after as many as 1,000 recharges. A full recharge comprises a complete charge-and-discharge cycle, and does not always occur each time the notebook is plugged in to a power source, as several partial charges can add up to a full recharge.  
14. The listed battery life is based on MobileMark 2007™ productivity mode testing with wireless on. Details of MobileMark2007™ testing are available at www.bapco.com. Battery life rating is for comparison purposes only. Actual battery life varies by model, configuration, applications, power management settings, operating conditions, and utilized features. A battery's maximum capacity decreases with time and use.  
15. The notebook enters Deep Sleep after 8 hours in Sleep mode, or after the period set by the user. In this mode, battery life lasts up to 50 days if the battery is fully charged when the notebook goes to Sleep.  
16. Bundled software may vary depending on hardware configuration, OS and regional availability.  
17. Trial periods vary depending on the geographic region and specifications: 365-day trial for China, Taiwan, Hong Kong and Singapore (Simplified Chinese and Traditional Chinese OS models); 60-day trial for other regions.

As a phenomenon known to thin-film transistors (TFTs), liquid crystal displays (LCDs) commonly exhibit a small number of discoloration dots, as so-called "non-conforming pixels." This phenomenon is a limitation of TFT LCD technology, not a product defect, and as such is not covered by Acer's warranty.
